# 1 Introduction

## 1.1 Background

Risk recognition and management are viewed by the Company as integral to its objectives of creating and maintaining shareholder value, and to the successful execution of the Company's strategies. Through this risk management process, we identify and manage risks associated with operating our business. Risks can take various forms and can have material impact on our reputation, sustainability, compliance, operations, human resources and financial performance.

## 1.2 Purpose

The purpose of the Risk Management Policy (the **Policy**) is to ensure that:

- (a) appropriate systems are in place to identify to the extent reasonably practicable all material risks that may impact on the Company's business;
- (b) the financial impact of identified risks is understood, and appropriate internal control systems are in place to limit the Company's exposure to such risks;
- (c) appropriate responsibilities are delegated to control the identified risks effectively; and
- (d) any material changes to the Company's risk profile are disclosed in accordance with the Company's Continuous Disclosure Policy.

For the purpose of this Policy, "risk" is defined as possible outcomes that could materially adversely impact on the Company's financial performance, assets, reputation, people or the environment.

## 1.3 Board responsibility

The Board is responsible for establishing risk parameters to identify and manage risk on an ongoing basis. It is the role of management to design and implement the risk framework and ensure that the Company operates within the risk parameters set by the Board. As a minimum, the Board is required to:

- (a) oversee the establishment and implementation of the risk management system; and
- (b) review the effectiveness of the Company's risk management system,

in relation to the processes, structures and culture established to identify, assess, treat and monitor risk to support the achievement of the Company's objectives.

In specific areas, the Board is assisted by the Audit and Risk Management Committee. The Audit and Risk Management Committee assists the

Board with assessing the risk management framework to determine whether it is sound and is operating in accordance with the nature and extent of the acceptable levels of risk determined by the Board. It is responsible for establishing procedures which provide assurance that major business risks are identified, consistently assessed and appropriately addressed.

Not all aspects of risk management can be formalised, and the Company places considerable reliance on the skill, experience and judgment of its people to take risk managed decisions within the framework of this Policy and to communicate openly on all risk related matters.

---

## **2 Key principles and concepts**

### **2.1 Review Identified Business Risks**

There are a number of risks which are inherent to the business activities which the Company undertakes.

These risks may change over time as the external environment changes and as the Company expands its operations. The risk management process requires the Board to consider management's regular reviews of the Company's existing risks and the identification of any new and emerging risks facing the Company, including financial and non-financial matters. It also requires the management, including mitigation where appropriate, of these risks.

### **2.2 Business Risk Management Policies and Practices**

In order to properly identify and develop strategies and actions to manage business risks, the Company has put in place a business risk management framework based on the following key elements:

- (a) an Audit and Risk Management Committee which meets periodically to consider and assess specific risks identified by management. The Audit and Risk Management Committee should have a thorough understanding of the Company's activities and should be conversant with the Company's business plans, objectives and values;
- (b) an assessment of the potential impact of identified business risks and the likelihood of occurrence;
- (c) a ranking of the business risk in accordance with the likely impact on the Company;
- (d) an assessment of the acceptability of each identified risk;
- (e) a consideration and decision on the proposed actions to eliminate, reduce or manage each material risk; and
- (f) an assignment of the responsibilities for the management of each risk.

Risk management encompasses all areas of the Company's activities. Once a business risk is identified, the risk management processes and systems implemented by the Company are aimed at providing the necessary framework to enable the business risk to be managed.

The overall results of this assessment are presented to the Board, in oral and written form, at every Board meeting following an Audit and Risk Management Committee meeting by the Chair of the Audit and Risk Management Committee and updated as needed.

The Board reviews the Company's risk management at every Board meeting, and where required, makes improvements to its risk management and internal compliance and control systems.

## **2.3 Additional Risk Management Policies and Practices**

In addition to the specific risk management process described in this Policy, the Company has the following procedures and practices which are designed to manage specific business risks:

- (a) an insurance program which is reviewed by the Audit and Risk Management Committee and by the Board;
- (b) regular budgeting and financial reporting;
- (c) the Company's business plan;
- (d) corporate strategy guidelines and procedures to review and approve the Company's strategic plans;
- (e) legally binding commitments and expenditure exceeding certain levels must be submitted to the Board for approval;
- (f) procedures/controls to manage financial exposures and operational risks;
- (g) oversight of the Company's financial affairs by the Audit and Risk Management Committee;
- (h) regular performance reporting enabling the identification of performance against targets and evaluation of trends; and
- (i) ongoing training and development programs.

Additionally, all other significant areas of the Company's operations are subject to regular reporting to the Board, including exploration, development, finance, legal, safety, environment, government and investor relations.

---

## **3 Other matters**

### **3.1 Amendment of policy**

This Policy can only be amended with the approval of the Board.

### **3.2 Adoption of Policy and Board review**

This Policy was adopted by the Board as at 26 August 2019 and takes effect from 1 September 2019 and replaces any previous policy in this regard.

The Board and the Audit and Risk Management Committee must review and reassess this Policy at least once each calendar year. Any amendments to this Policy must be approved by the Board. The Company Secretary will communicate any amendments to employees as appropriate.
